[Little leaks sink the big ship. The big gaping holes get fixed quickly; however the nickel and dime leaks are responsible for more companies going bankrupt than anything else.

Would anyone agree to hire my services at sixty hours a week starting at one cent and doubling it every week for one year? I doubt it since it the total would exceed \$45 Trillion dollars!

In this presentation I will show a very simple way to identify little leaks and how to calculate the cost to fix them. Many business owners have doubled their annual profits with this process.]
